My opinion on the software: Your alternative to excel mindmap tool Pros: It will automatically generate the diagram based on the table structure and primary/foreign key mapping. It is fully automatic and fast. It is free for personal use. It is easy to use. Cons: If you don't have Excel you will need to install it. Thanks! A: I wrote one - I think it's good enough for the purposes you're likely to have: Can be downloaded and extracted in a couple of minutes, as it's just a zip file. It is open source, so it will be around forever. Nutritional intervention with dietary restriction improves gut-brain interactions in multiple sclerosis. Patients with multiple sclerosis (MS) are undernourished, which may contribute to both decreased functional capacity and increased risk of morbidity and mortality. Despite recognition of these problems, there is little consensus on the best approach to nutritional intervention in MS. To determine if nutritional intervention with dietary restriction improves motor and cognitive function in individuals with MS. Randomised, controlled, two-arm, single-blinded, placebo-controlled trial conducted in the outpatient clinic at an urban tertiary hospital and a rural private practice. Participants with relapsing remitting MS with a diagnosis of 1-15 years were recruited. Individuals with cognitive impairment were excluded from the trial. Participants in both groups were provided with a hypocaloric, isocaloric, low-fat diet. The experimental group was provided with a dietary restriction of 550 kcal per day for the first month, followed by a reduction of 100 kcal per day for three months. One month following dietary intervention, the experimental group demonstrated improved hand grip strength and endurance, motor speed, timed walk distance, brain and spinal cord magnetic resonance imaging, cognitive speed, and cognitive functions compared to controls (p The relationship between sleep complaints and quality of life in liver transplant patients. Sleep complaints are common in liver transplant (LT) patients and have been associated with a poor quality of life (
