
Mcafee VirusScan Enterprise V8.8 Patch 9 Full Version ellagar

The system file can be retrieved from the following location. For Windows 7, type %systemroot%\cloud-eip.10\ipstore\win7\systemfile. It should be a.p7b file. For Windows 8 and 8.1, type %systemroot%\cloud-eip.10\ipstore\win8\systemfile. It should be a.p7b file. For Windows Server 2012, type %systemroot%\cloud-eip.10\ipstore\win2012\systemfile. It should be a.p7b file. This error occurs only if VSE 8.8 Patch 8 is installed or upgraded. You can resolve this issue by installing and/or upgrading VSE 8.8 Patch 8 to the latest version. Article ----- Installing and updating the Microsoft Secure eCloud (VSE) platform solution using the Microsoft Secure eCloud Services (VSE) installer. Prerequisites ----- The system administrator and Microsoft Secure eCloud Services (VSE) administrator must be assigned to the resource group. Solution ----- 1. Create a user name and password and login as this user in the Microsoft Secure eCloud Services (VSE) Administrator user interface, navigate to **Secure > Secure Resource Provisioning**, and click the **Enable** button. 2. In the **Secure Resource Provisioning** dialog box, select **Secure Resources**, enter a name and description for the Secure Resource, and click **OK**. For more information about creating a Secure Resource, see [Create a Secure Resource]. 3. In the **Secure Resource Provisioning** dialog box, click **Secure Resources**, select the Secure Resource, and click the **Add** button. 4. In the **Secure Resource Provisioning** dialog box, select **Microsoft Azure**, select **Microsoft Azure** as the **Target type**, and click **OK**. For more information about selecting a Target type, see [Target types for Secure Resources]. 5. In the **Secure Resource Provisioning** dialog box, select **Microsoft Azure**, select **Microsoft Azure** as the **Target type**, and click
