Benefits of AutoCAD

AutoCAD is the most widely used CAD tool in the architectural, civil engineering, and construction industries. There are over six million AutoCAD users worldwide. The company estimates that they create over 300,000,000 DWG drawings every year. Not to mention that you can create awesome 3D models with a single click of the button. Also, AutoCAD is a very powerful software. There are plenty of

online resources where you can find tutorials on how to use the software. You can even create training videos and share them with your peers.
