### What's New in the Death 2 Ads?

Death 2 Ads is a powerul application designed to block advertising from downloading onto your PC, stop those annoying adverts from loading and protect children from other undesirable websites. Would you like to automatically get rid of those adverts plastered all over webpages? Don't like advertising wasting your precious bandwidth and time? Did you know they are also tracking your activity? Use Death 2 Ads and take control of Internet advertising and stop them tracking you through secret ad based cookies. Note: This application requires registration. Features: \* Configure Death 2 Ads to work only with you or to work for your children and family. \* Block all ads, pop-ups and banners on your PC. \* Block all ads on the home page of your Internet browser. \* Stop the annoying adverts from loading. \* Block tracking cookies and other secret ad based tracking technology. \* Automatic blocker which doesn't require any user action. \* Control the level of protection you have from ads and ads based tracking technology. \* Intuitive interface. \* Various saved sessions. \* Child protection. Changes: Version 1.9.3 - To-do list added to the main menu. Version 1.9.2 - Block any cookies for websites even if you are not currently visiting them. Version 1.9.1 - Added feature to block any unknown cookies from being placed. Version 1.9.0 - Minor bug fixes. Version 1.8.2 - When blocking with custom proxy settings option, the server now tells you where to add your proxy server information. Change Log: Version 1.7.5 - Various small bugs fixed. Version 1.7.4 - Added SOCKS5 support. Version 1.7.3 - Fixed a bug which stopped the program from working with certain proxy servers. Version 1.7.2 - Fixed a minor problem with the application shutting down during the time when it was blocking ads and advertising cookies. Version 1.7.1 - Fixed a minor problem with the program crashing on certain proxy servers. Version 1.7.0 - Now supports SOCKS4/SOCKSS. Version 1.6.4 - Fixed a problem with "Change Settings..." options not taking effect. Version 1.6.3 - Now works with multiple Internet proxies. Version 1.6.2 - Fixed a problem with the program updating its preferences file. Version 1.6.1 - Fixed a problem with the settings not taking effect if the settings.txt file wasn't on the Desktop. Version 1.6.0 - Added support for all versions of Internet Explorer and Firefox. Version 1.5.4 - Fixed a small problem with the program crashing when trying to block all third-party cookies. Version 1.5.3 - Minor bug fixes. Version 1.5.2

---

**System Requirements:**

Key Features: Back to the Future is an indie PC game and we had to do our own port. We've spent a lot of time trying to make this the best version possible and we were happy to release our port a few days ago, on the 21st of November. If you want to read about the process of bringing Back to the Future into Unity, check out our blog post. Here is a quick list of the features that we have: Brand new and fully rebuilt game engine. Brand new story campaign with new characters.
