You can get MarilynHickeyEncounterTheWord Full HD Online [www.Q: Javascript callback function to create nested groupings I'm new to Javascript and can't figure out how to create this callback function. I've looked at the GitHub page of Douglas Crockford which has no examples of what I'm trying to achieve. Basically, I need to create groups of arbitrary numbers of rows using a callback. The goal is to have no more than one value per group. The data source is from a CSV, and in each row there's a name, number, and a description. The last name, number, and description will be used in the callback. Here's what the data looks like: Name, Number, Description Axl, 1, T1 Jack, 2, T2 Amy, 3, T3 Fred, 1, T4 Sam, 3, T5 This is my callback function. It's also currently returning three names (Axl, Jack, and Amy), three numbers (1, 2, and 3), and three descriptions (T1, T2, and T3). function createGroups(line){ var values = line.split(",") return { Name: values[0], Numbers: values[
